Technical Report No. 15**

July 1995

OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Huachuca in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Huachuca began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Arizona State Historic Preservation Office in Phoenix, Arizona and at the Arizona State Museum in Tucson, Arizona. The records search was performed in May 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT HUACHUCA

According to site file information, archaeological investigations at Fort Huachuca began in 1964 with an excavation by Jon Nathan Young at the Garden Canyon Site, and have continued to the present. These investigations have been conducted by several institutions:

Amerind Foundation, Dragoon, Arizona
Archaeological and Historical Research, Las Cruces, New Mexico
Arizona State Museum, Tucson, Arizona
Cella-Barr Associates, Tucson, Arizona
Cultural and Environmental Systems, Tucson, Arizona
Fort Huachuca Archaeologists, Fort Huachuca, Arizona
Statistical Research, Inc., Tucson, Arizona
SWCA, Inc., Tucson, Arizona
U.S. Army Corps of Engineers, Los Angeles District, Los Angeles, California, and
Earl Sires.

Only the investigations by the Amerind Foundation, Cella-Barr Associates, Arizona State Museum, Statistical Research, Inc., and independent researcher Earl Sires, produced archaeological collections. Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 650 artifacts have been identified for Fort Huachuca. Artifacts recovered include prehistoric flaked stone tools, groundstone, ceramics, ornaments, animal bone, and shell, as well as historic materials. A cervical vertebra, tentatively identified as human, was also excavated.

As of the date of this report, the collections are located in the following three repositories:

Fort Huachuca Archaeologist's Office:	~550 artifacts
Arizona State Museum:	an unknown number of artifacts
Amerindian Foundation:	~100 artifacts

The attached *Summary of Current Locations of Archaeological Collections from Fort Huachuca* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations conducted on the installation.

The Arizona State Museum in Tucson curates an unknown number of artifacts collected from the surface of one site. Site AZ EE:7:22, a Hohokam habitation site, was recorded by Earl Sires in June 1980 and according to the site record, he collected ceramics, lithics and groundstone artifacts. The Museum's records indicate that it has materials from this site, but the number is presently unknown.

Collections Not Located

Approximately 50 burials and associated artifacts from an archaeological investigation on Fort Huachuca by Jon Nathan Young in 1964 are presently unlocated. They were accessioned by the Fort Huachuca Museum and therefore fall under the Center for Military History's NAGPRA Compliance Project. According to John Murray, post archaeologist, the whereabouts of these remains and associated objects is unknown. Mr. Murray and Fort Huachuca Museum personnel have requested special funding to investigate this matter (telephone conversation, 30 March 1995).

NAGPRA Related Materials

No funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

Statistical Research, Inc. recently completed analysis of the faunal remains from the combined collections from Garden Canyon sites, and tentatively identified a possible human cervical vertebra. This collection has been returned to the Fort Huachuca Archaeologist's Office for curation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Huachuca are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB); and Appendix VI provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT HUACHUCA

Three rock art sites from Garden Canyon (AZ EE:11:13, 15 and 30) have been connected with the aboriginal Apache of the area (Altschul et al. 1993). Although no other items in the collections can be definitively associated with a specific Native American group, historical records indicate that the Western Apache, the Chiricahua Apache, the Tohono O'odham (formerly the Papago) (Peterson and Otter n.d.:6-14; U.S.G.S. n.d.; Waldman 1985; Juan 1994), and the Pima (U.S.G.S. n.d.; Ezell 1983; Waldman 1985; Innis 1994) at one time occupied the region of present day Fort Huachuca. All of these groups are federally recognized.

The Western Apache have adjudicated lands approximately twenty miles north of Fort Huachuca (U.S.G.S. n.d.). Fort Huachuca is included in an area taken from the Western Apache (Peterson and Otter n.d.: 6-14). Tribal members now occupy the San Carlos Reservation in San Carlos, Arizona (Cole 1994:44-48; Peterson and Otter n.d.:6-14), and the Fort Apache Reservation in Whitewater, Arizona. The Western Apache share the San Carlos Reservation with Chiricahua Apaches, and together they are referred to as the San Carlos Apache Tribe (Cole 1994:44-48).

The Chiricahua Apache land claim is approximately eight miles east of Fort Huachuca (U.S.G.S. n.d.). They do not have their own reservation lands in Arizona, but have a reservation at Fort Sill, Oklahoma, where they are referred to as the Fort Sill Apache Tribe. Other tribal members can be found on the Mescalero Reservation in Mescalero, New Mexico, which they share with the Mescalero Apaches, and on the San Carlos Reservation in San Carlos, Arizona (Cole 1994:44-48).

The Tohono O'odham are one of the few tribes that were not relocated from their ancestral lands in southern Arizona (Juan 1994:637-639), approximately ten miles west of Fort Huachuca (Peterson and Otter n.d.:6-14; U.S.G.S. n.d.). Members of this group can be found on the Ak Chin Reservation in Maricopa, Arizona, and on the Tohono O'odham Reservation in Sells, Arizona (Juan 1994:637-639).

The Pima claim ancestral lands roughly forty miles northwest of Fort Huachuca (U.S.G.S. n.d.). They are now located on the Gila River Indian Reservation in Sacaton, Arizona, and on the Salt River Reservation in Scottsdale, Arizona (Innis 1994:452-454).

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 Summary letters (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTERS FOR FORT HUACHUCA, ARIZONA

[Installation Header]

Mr. Ronnie Lupe, Chairman
White Mountain Apache Tribal Council
P.O. Box 700
Whitewater, Arizona 85941

Dear Mr. Lupe:

I am writing to inform you of collections held by Fort Huachuca that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the White Mountain Apache. Fort Huachuca has documented these archaeological collections in a summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Huachuca is responsible for collections that include approximately 550 artifacts housed at the Fort Huachuca Archaeologist's Office, an unknown number of artifacts housed at Arizona State Museum in Tucson, Arizona, and approximately 100 artifacts housed at the Amerindian Foundation in Dragoon, Arizona. These archaeological collections were generated from surveys and/or excavations conducted from 1964 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. Included in these collections is a cervical vertebra, tentatively identified as human.

We are notifying the White Mountain Apache because some of these materials were found on or near the area thought to be part of the territory occupied or used aboriginally by the White Mountain Apache. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, the following potential Native American human remains were identified in Fort Huachuca's collections. Our research thusfar

indicates that a possible human cervical vertebra was identified during an analysis of the faunal materials recovered from Garden Canyon by Statistical Research, Inc. in 1991. This bone is presently curated in the Fort Huachuca Archaeologist's Office.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory. Fort Huachuca is scheduled to conduct our Section 5 Inventory investigations of human remains in 1996. If the White Mountain Apache wishes to comment on, or participate in, the Section 5 Inventory, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Huachuca and the White Mountain Apache on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Mr. Raymond Stanley, Chairman
San Carlos Apache Tribe
P.O. Box O
San Carlos, Arizona 85550

Dear Mr. Stanley:

I am writing to inform you of collections held by Fort Huachuca that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the San Carlos Apache. Fort Huachuca has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Huachuca is responsible for collections that include approximately 550 artifacts housed at the Fort Huachuca Archaeologist's Office, an unknown number of artifacts housed at Arizona State Museum in Tucson, Arizona, and approximately 100 artifacts housed at the Amerindian Foundation in Dagoon, Arizona. These archaeological collections were generated from surveys and/or excavations conducted from 1964 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. Included in these collections is a cervical vertebra, tentatively identified as human.

We are notifying the San Carlos Apache because some of these materials were found on or near the area thought to be part of the territory occupied or used aboriginally by the San Carlos Apache. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, the following potential Native American human remains were identified in Fort Huachuca's collections. Our research thusfar indicates that a possible human cervical vertebra was identified during an analysis of the faunal materials recovered from Garden Canyon by Statistical Research, Inc. in 1991. This bone is presently curated in the Fort Huachuca Archaeologist's Office.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory. I am writing to inform you of collections held by Fort Huachuca that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Tohono O'odham. Fort Huachuca has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Huachuca is responsible for collections that include approximately 550 artifacts housed at the Fort Huachuca Archaeologist's Office, an unknown number of artifacts housed at Arizona State Museum in Tucson, Arizona, and approximately 100 artifacts housed at the Amerindian Foundation in Dagoon, Arizona. These archaeological collections were generated from surveys and/or excavations conducted from 1964 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. Included in these collections is a cervical vertebra, tentatively identified as human.

We are notifying the Tohono O'odham because some of these materials were found on or near the area thought to be part of the territory occupied or used aboriginally by the Tohono O'odham. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, the following potential Native American human remains were identified in Fort Huachuca's collections. Our research thusfar indicates that a possible human cervical vertebra was identified during an analysis of the faunal materials recovered from Garden Canyon by Statistical Research, Inc. in 1991. This bone is presently curated in the Fort Huachuca Archaeologist's Office.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory. Fort Huachuca is scheduled to conduct our Section 5 Inventory investigations of human remains in 1996. If the Tohono O'odham wishes to comment on, or participate in, the Section 5 Inventory, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Huachuca and the Tohono O'odham on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Dear Mr. Makil:

I am writing to inform you of collections held by Fort Huachuca that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the White Mountain Apache. Fort Huachuca has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Huachuca is responsible for collections that include approximately 550 artifacts housed at the Fort Huachuca Archaeologist's Office, an unknown number of artifacts housed at Arizona State Museum in Tucson, Arizona, and approximately 100 artifacts housed at the Amerindian Foundation in Dagoon, Arizona. These archaeological collections were generated from surveys and/or excavations conducted from 1964 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. Included in these collections is a cervical vertebra, tentatively identified as human.

We are notifying the White Mountain Apache because some of these materials were found on or near the area thought to be part of the territory occupied or used aboriginally by the White Mountain Apache. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, the following potential Native American human remains were identified in Fort Huachuca's collections. Our research thusfar indicates that a possible human cervical vertebra was identified during an analysis of the faunal materials recovered from Garden Canyon by Statistical Research, Inc. in 1991. This bone is presently curated in the Fort Huachuca Archaeologist's Office.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory. Fort Huachuca is scheduled to conduct our Section 5 Inventory investigations of human remains in 1996. If the White Mountain Apache wishes to comment on, or participate in, the Section 5 Inventory, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Huachuca and the White Mountain Apache on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Ms. Mary V. Thomas, Governor
Gila River Indian Community Council
P.O. Box 97
Sacaton, Arizona 85247

Dear Ms. Thomas:

I am writing to inform you of collections held by Fort Huachuca that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Pima. Fort Huachuca has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Huachuca is responsible for collections that include approximately 550 artifacts housed at the Fort Huachuca Archaeologist's Office, an unknown number of artifacts housed at Arizona State Museum in Tucson, Arizona, and approximately 100 artifacts housed at the Amerindian Foundation in Dagoon, Arizona. These archaeological collections were generated from surveys and/or excavations conducted from 1964 to the present. The collections consist of prehistoric stone tools, ceramics, ornaments, animal bones, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. Included in these collections is a cervical vertebra, tentatively identified as human.

We are notifying the Pima because some of these materials were found on or near the area thought to be part of the territory occupied or used aboriginally by the Pima. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, the following potential Native American human remains were identified in Fort Huachuca's collections. Our research thusfar indicates that a possible human cervical vertebra was identified during an analysis of the faunal materials recovered from Garden Canyon by Statistical Research, Inc. in 1991. This bone is presently curated in the Fort Huachuca Archaeologist's Office.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory. Fort Huachuca is scheduled to conduct our Section 5 Inventory investigations of human remains in 1996. If the Pima wishes to comment on, or participate in, the Section 5 Inventory, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Huachuca and the Pima on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT HUACHUCA, ARIZONA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

APPENDIX V

NATIONAL ARCHEOLOGICAL DATA BASE REFERENCES FOR FORT HUACHUCA, ARIZONA

There are no NADB references for Fort Huachuca, Arizona.

APPENDIX VI

OTHER REFERENCES TO FORT HUACHUCA

Attempts were made to obtain copies of references that were cited in NADB, on the site records, or in other publications but were not available at the Arizona State Historic Preservation Office or the Arizona State Museum. From telephone conversations with various persons conversant with the archaeology of Fort Huachuca, the MCX determined that no new collections are reported in these references.

FORT HUACHUCA REFERENCES NOT ON FILE AT THE ARIZONA STATE HISTORIC PRESERVATION OFFICE OR ARIZONA STATE MUSEUM

Cottrell, Marie

1990 *Assessment Completed for 100+/- Acres Located in the Garden Canyon Area of Fort Huachuca, Cochise County, Arizona.*

1990 *Assessment Completed for 225+/- Acres Located in the Garden Canyon Area of Fort Huachuca, Cochise County, Arizona.*

Hemmings, E.T.

1981 *Report of Survey of Bottom Ranch Locality in White Water Creek for the Arizona State Museum.*

Wilson, John P.

1982 *Cultural Resources of the Proposed Southern Arizona Auxiliary Airfields, Cochise and Pima Counties, Arizona. Report No. 28. Las Cruces, New Mexico.*
